### Key Features & Construction:

- Eco-minded durable construction with a thick grade stainless steel body and high efficient insulation.
- Premium-grade fibre lid designed for enhanced durability, consistent performance, and extended service life, providing improved protection against debris versus conventional brick lids.
- Conservatively rated Kanthal A1 heating elements and wiring for long service life
- Mains power cable and a standard domestic 3-pin household plug are supplied with the H30, H46, and H63 (13 amp) kilns. The H63 (16 amp) model is supplied with a 16 amp commando plug. The H81 and H103 models include 3 metres of cable; a 32 amp commando plug is recommended and can be purchased via our website or customers may supply their own for fitting prior to despatch
- Captive key interlock fitted as standard in line with Health & Safety best practice
- Double contactors system included for enhanced operational security
- ST215C WiFi kiln controller with 32 programmable schedules (up to 32 segments each), it delivers precise ramp/soak control for consistent firing. Features include WiFi, remote monitoring, and dual data logging.
- 24-month warranty (elements excluded) - full Cromartie support and peace of mind with every purchase.

Delivery - We can deliver "kerbside" or into position according to customers' requirements. In most cases we can arrange for full electrical connection, commissioning and operational training at the time of delivery. Delivery charges on this basis will be quoted separately and according to the specific requirements and circumstances. For a personalised quotation, please email: [enquiries-cromartiehobbycraft@outlook.com](mailto:enquiries-cromartiehobbycraft@outlook.com)
